

Creating a skill-based course model for Class 2

Language

1. Reading Skills:

- Storytelling sessions with emphasis on comprehension.
- Reading aloud exercises to improve pronunciation.
- Introduction to phonics for better word recognition.

2. Writing Skills:

- Creative writing activities to encourage imagination.
- Basic sentence formation and grammar exercises.
- Simple dictation exercises for spelling and handwriting practice.

3. Language Development:

- Vocabulary-building games and activities.
- Group discussions and show-and-tell sessions.
- Role-playing to enhance communication skills.

Mathematics

1. Number Sense:

- Hands-on activities for understanding numbers up to 100.
- Introduction to basic arithmetic operations (addition, subtraction, multiplication, division).
- Problem-solving activities using real-life scenarios.

2. Geometry and Measurement:

- Exploring shapes through interactive games.
- Basic measurement activities using everyday objects.
- Introduction to spatial awareness and orientation.

3. Logical Reasoning:

- Puzzles and pattern recognition exercises.
- Sequencing and sorting activities.
- Critical thinking games and challenges.

Social Studies (EVS - Environmental Studies)

1. Community and Environment:

- Learning about the local community and its roles.
- Understanding the concept of neighborhoods and communities.

2. Nature and Surroundings:

- Exploring the natural environment, including plants and animals.
- Observational activities like nature walks and field trips.

3. Cultural Awareness:

- Introduction to diverse cultures and traditions.
- Stories and activities that promote cultural sensitivity.

4. Maps and Geography:

- Basic understanding of maps and directions.
- Exploring simple geographical concepts related to local surroundings.

Integrative Activities

1. Project-based Learning:

- Collaborative projects that involve all three subjects.
- For example, creating a storybook (language), counting and measuring elements (mathematics), and incorporating environmental themes (social studies).

2. Hands-on Activities:

- Science experiments related to the environment.
- Math games using everyday objects.

3. Field Trips:

- Visits to local places of cultural or historical significance.
- Nature walks to observe and learn about the environment.
